

ABDUR RAFAY

ML / AI - ENGINEER

Karachi, Pakistan • [Linkedin](#) • a.rafayansari99@gmail.com • + 92 3122053670 • ar-datafolio.netlify.app

SUMMARY

Software Engineering student with hands-on experience in machine learning, data analysis, LLM-powered applications, and dashboard development. Built projects involving healthcare risk prediction, cybersecurity assistants, OCR integration, FastAPI APIs, and data visualization. Seeking AI/ML internship or entry-level opportunities to apply machine learning, data science, and software engineering skills in real-world environments.

PROFESSIONAL EXPERIENCE

CODUP

Karachi (On-site)

Intern Business Analyst

Aug 2025 – Nov 2025

- Gathered and analyzed business requirements and documented workflows for client projects.
- Prepared Jira tickets, requirement analysis documents, and project specifications for cross-functional teams.
- Configured and evaluated e-commerce solutions using WordPress, Shopify, and BigCommerce platforms.
- Collaborated with stakeholders to translate business needs into technical requirements.
- Developed understanding of B2B and B2C e-commerce processes and platform capabilities.

TECHNICAL SKILLS AND TOOLS

Programming: Python, SQL, HTML, CSS, JavaScript

Machine Learning & Data Science: Pandas, NumPy, Scikit-learn, EDA, Data Preprocessing, Feature Engineering, Model Evaluation, Data Visualization

AI & Backend: LLM Applications, OCR Integration, FastAPI, NLP Fundamentals

Tools: Power BI, Excel, Git/GitHub, Jira, Web Scraping

Concepts: OOP, DSA, Machine Learning, Deep Learning Fundamentals

EDUCATION

Karachi University (UBIT)

Karachi, Sindh

Bachelor of Science – BS (SE), Software Engineering

2021-2025

CERTIFICATIONS

Business Analytics using Excel (SimpliLearn)

Jan 2024

Python In-depth Course for Beginners (Udemy)

May 2021

Intro to Machine Learning (self-paced, 2024)

Feb 2024

SQL for Data Analytics (SimpliLearn)

May 2025

AI, Machine learning, Deep learning and Communication (NAVTTTC Program)

Feb-May 2026

PROJECTS

Cancer Risk Analysis (Python, Pandas, Scikit-learn)

- Performed data preprocessing, exploratory data analysis, and feature engineering on healthcare datasets.
- Built and evaluated machine learning models for cancer risk prediction and analysis.

Coffee Shop Performance Dashboard (Power BI, Excel)

- Developed an interactive dashboard to analyze customer behavior, sales performance, and operational KPIs.
- Enabled data-driven insights through visual reporting and trend analysis.

FYP Cybersecurity Chatbot (Python, Pandas, Scikit-learn, LLM, FastAPI)

- Developed an LLM-powered cybersecurity assistant capable of answering threat-related queries.
- Integrated OCR functionality to extract and analyze text from cybersecurity screenshots.
- Built backend services using FastAPI to support scalable interactions and inference workflows.

ACHIEVEMENTS

5 Position and Participation award

- Secured 5th position in IEEE YESIST12 Final Year Project Ideas Submission Competition for the project 'CyberSecurity Virtual Assistant'; and received participation certificate.
