

ABDUR RAFAY

SOFTWARE ENGINEER

Karachi, Pakistan • a.rafayansari99@gmail.com • +92 312 2053670 • linkedin.com/in/abdur-rafay-1x • github.com/arafayansari99-maker

SUMMARY

Fresh Software Engineering graduate from Karachi University with a strong foundation in Python, OOP, Data Structures & Algorithms, Machine Learning, and Deep Learning. Built production-grade projects including an LLM-powered cybersecurity chatbot (FastAPI + OCR), a cancer risk ML pipeline, and multiple data dashboards. Internship experience as a Business Analyst at CODUP, working across eCommerce platforms and agile teams. Eager to contribute to engineering teams as a backend, full-stack, or ML-integrated software engineer.

PROFESSIONAL EXPERIENCE

CODUP — Karachi (On-site)

Intern Business Analyst

Aug 2025 – Nov 2025

- Gathered and documented business requirements; prepared Jira tickets, Top-level approach docs, and Requirement Analysis Documents.
- Configured and evaluated eCommerce solutions on WordPress (WooCommerce), Shopify (Plus sandbox), and BigCommerce platforms.
- Collaborated with cross-functional teams to translate business needs into clear technical specifications.
- Developed working knowledge of B2B/B2C eCommerce processes, Klaviyo marketing automation, and HubSpot CRM workflows.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, PHP, HTML,
ML & Data: Pandas, NumPy, Scikit-learn, EDA, Feature Engineering
Concepts: OOP, DSA, Machine Learning, Software Design Patterns

Backend: FastAPI, Laravel, REST APIs
AI / NLP: LLM Applications, OCR Integration, Deep Learning Fundamentals
Tools: Git/GitHub, Power BI, Excel, Jira, Postman, VS Code, Jupyter

PROJECTS

FYP — Cybersecurity Virtual Assistant (Python, FastAPI, LLM, OCR, Scikit-learn)

- Built an LLM-powered chatbot answering cybersecurity threat queries via natural language prompts.
- Integrated OCR to extract and analyze text from cybersecurity-related screenshots.
- Developed scalable FastAPI backend to serve inference workflows and support concurrent users.
- Secured 5th position at IEEE YESIST12 Final Year Project Ideas Submission Competition.

Cancer Risk Analysis (Python, Pandas, Scikit-learn)

- Performed end-to-end data preprocessing, EDA, and feature engineering on healthcare datasets.
- Built and evaluated classification models for cancer risk prediction with performance benchmarking.

Coffee Shop Performance Dashboard (Power BI, Excel)

- Developed an interactive Power BI dashboard tracking sales KPIs, customer behavior, and operational trends.

Cookie Company Sales Analysis (Excel)

- Analyzed sales data using pivot tables and charts to surface actionable business insights.

EDUCATION

Karachi University (UBIT) 2021 – 2025
Bachelor of Science — Software Engineering (BS SE)
Key Areas: OOP, DSA, Machine Learning, Deep Learning,
Calculus, Linear Algebra, Database Systems

Intermediate — Pre-Engineering 2020
Maths, Physics, Computer Science

CERTIFICATIONS

AI, Machine Learning, Deep Learning &
Communication — NAVTTC Program Feb–May 2026
SQL for Data Analytics — SimpliLearn May 2025
Business Analytics using Excel — SimpliLearn Jan
2024

Web Development using PHP & Laravel — Aptech
Feb 2022

Responsive Web Development — Aptech Feb 2022

Python In-depth Course for Beginners — Udemy
May 2021

ACHIEVEMENTS

**5th Position — IEEE YESIST12 International
Competition**

- Secured 5th position in the IEEE YESIST12 Final
Year Project Ideas Submission Competition for
"CyberSecurity Virtual Assistant" and received a
participation certificate.
