

ABDUR RAFAY

Software Engineer

Karachi, Pakistan • [Linkedin](#) • a.rafayansari99@gmail.com • + 92 3122053670 • [ar-datafolio.netlify.app](#) • [GitHub](#)

SUMMARY

Aspiring Software Engineer student seeking internship or entry-level opportunities to apply and expand foundational knowledge in Data Analyst, AI, machine learning, and data science. Motivated to contribute to real-world projects while gaining hands-on experience and advancing technical expertise.

PROFESSIONAL EXPERIENCE

CODUP

Karachi (On-site)

Intern Business Analyst

Aug 2025 – Nov 2025

- Understanding of WordPress ecommerce platform through WordPress course.
- Made multiple stores on WordPress (Blog website, WooCommerce website, Brochure Website) on Local by Flywheel.
- Understanding the shopify platform using shopify documentation and help center.
- Create a shopify plus sandbox store to configure ecommerce functionalities and understanding of B2B and B2C functionalities shopify provides.
- Understanding the BigCommerce platform through BigCommerce documentation.
- Created a store on BigCommerce to configure ecommerce functionalities and explore its features.
- Experience in writing documents for Jira ticket, Top-level approach, and Requirement Analysis Document for new lead project.
- Clear understanding of identifying the requirements of business and explaining the requirement to the cross-functional teams.
- Attended multiple client meetings with my seniors to understand the business requirements and problems faced by the clients.

SKILLS AND TOOLS

Data Preprocessing, EDA, Machine Learning, Deep Learning, NLP, LSTM, Optimizers, Scikit-learn, NumPy, Pandas, Matplotlib OOP, DSA, Model Training, ETL, Data Visualization and Web Scraping.

Languages - Python, SQL, HTML, CSS, JavaScript (Basic).

EDUCATION

Karachi University (UBIT)

Karachi, Sindh

Bachelor of Science – BS (SE), Software Engineering

2021-2025

CERTIFICATIONS

Business Analytics using Excel (SimpliLearn)

Jan 2024

Python In-depth Course for Beginners (Udemy)

May 2021

Intro to Machine Learning (self-paced, 2024)

Feb 2024

PROJECTS

Cancer Risk Analysis (Python, Pandas, Scikit-learn)

- Built and evaluated data models to analyze cancer risks using healthcare datasets. Focused on preprocessing, feature engineering, and data evaluation.

Coffee Shop Performance Dashboard (Power BI, Excel)

- Designed an interactive dashboard to visualize customer and sales metrics.

FYP Cybersecurity Chatbot (Python, Pandas, Scikit-learn, LLM, FastAPI)

- Created a chatbot UI and integrated Llama-cpp quantized model for the FYP (Cybersecurity Virtual Assistant Website).
- The chatbot handles user queries through prompts.
- The chatbot has OCR functionality to process screenshots related to cyberthreats, detect text in it and generate you the answer for the problem.

Image Classification on Cat/Dog Dataset (Python, CNN, TensorFlow, Deep Learning)

- A CNN trained to classify images of cats and dogs.
- Demonstrate hands-on deep learning with image processing, model training and evaluation

ACHIEVEMENTS

5 Position and Participation award

- Secured 5th position in IEEE YESIST12 Final Year Project Ideas Submission Competition for the project ‘Cyber Security Virtual Assistant’; and received participation certificate.
